

Curriculum – Maths

Aims: The primary objective of maths is to equip with life skills to use money, time, measuring, number skills and problem solving strategies. This may incorporate formal qualifications namely: entry level certificate, level 1 number and measure and potentially GCSE for those who are ready.

Maths is a cross curricular subject also met in humanities, PHSCE, PE, ICT, the workshop and in food technology. These are excellent ways to explore use and application.

The maths strands are:

- Number
- Shape space and measure
- Data handling
- Using, applying and operations

Maths is taught using a variety of strategies and practical work is an essential aspect of the subject.
